Publication copy with editorial notices, public references and disclosure edits where applicable.

The selected first demonstration remains the bounded overdue-repair workflow recorded in the system architecture (../Foundation/aos-00.md), DEC-021-026. This folder does not establish an authorised or completed implementation.

On 9 October 2026, Mark moved the Living Specification concept, RI-001 (deferred under DEC-098) to Phase 2 under DEC-098. Its original file identity and concept are retained there. Further design, scope and acceptance work are deferred. The Change Constitution (aos-change-constitution-v0-1.md) is a separate review draft and can be used without RI-001.
